English

EDUCATION

UNIVERSITY OF RWANDA,Kigali-Rwanda — *Bachelor's degree in computer and Software Engineering.*

01 2018- 06 2022

I have a Bachelor's degree in computer and software Engineering from University of Rwanda –College of Science and Technology.

PROJECTS

Phantom — *Transport based Project*

With Phantom passengers can find nearby bus and getting realtime information of the bus like Available seats,capacity,bus status like moving,stopping, adding or removing passengers.

Users can follow the bus motion on the map using their devices including laptops and mobile phones.

We built this project at Andela using React,Node Js,Express,Sequelize, and Postgresql.

Buymore — *online event ticket selling*

This is my personl project which allows users to host or search for events

It was built using React JS on frontend and backend was Laravel.

Aupair — *matching aupair and Host families*

This is a website platform wich helps people to find host families in

 Germany and aupairs around the world

It is a team project and was built using react,Node JS ,

 Express, Sequelize and MSql. i was working as a frontend developer.
